Charkit Chemical Company Looks Forward to Continued Growth in 2018

Wednesday, February 28, 2018

By Jennifer Gilbert

On August 9, 2017, [Charkit Chemical Company LLC](#) ("Charkit" or the "Company") announced that [LeBaronBrown Industries LLC](#) ("LBB"), a private investment firm with a multi-decade orientation, made an investment in Charkit. LBB's strategy is to bring capital and resources to company management teams to enable growth over a multi-decade period as a new long-term majority shareholder.

Simon Brown and Matthew LeBaron, founders of LeBaronBrown, added "We are delighted at the opportunity to partner with Charkit and provide resources to support the ongoing growth of the Company. Building on the Company's operating excellence, we will be actively seeking complementary acquisitions in the specialty chemical distribution industry."

This new agreement positioned Charkit for ongoing growth, including entry into new markets, forging agreements with distribution partners, and pursuing selective acquisitions of other specialty chemical distributors.

Recently, on January 3, 2018 it was announced that LeBaronBrown acquired a majority interest in [American International Chemical](#) ("AIC") in Framingham, Massachusetts. The combination of Charkit and AIC under the same platform will allow both companies to build on their existing supply chains as well as facilitate tremendous opportunities within the chemical industry.

Charkit and AIC have over 82 year of combined operating experience as premier specialty chemical and ingredients providers and expect to see continued growth through LeBaronBrown Industries.
